

## Morrey Private Dwelling

Cheadle, Staffordshire

**Status:**  
Completed 2005

**Client:**  
Mr & Mrs Morrey

**Description:**  
The project involved retaining, refurbishing and extending an existing building and creat-

ing new external terraces using the existing and new retaining walls.

The existing building was a former coffin makers workshop on a steeply sloping site adjacent to the high street in Cheadle and as such was a brown field site in a residential area. The existing workshop has been retained and converted to provide living areas on three separate levels, with access on two to enclosed private courtyards.

The building has also been extended in a single storey wing accommodating the kitchen, bathrooms and bedrooms around the upper courtyard. The new extension also has two mono-pitched grass roofs which blend into the surrounding hillside.
