

The Hermitage

Uttoxeter

Status:

Completed Sept ember 2010

Value:

£1.5 million

Client:

The Hermitage Care Home

Description:

This £1.5 million project incorporates the design of additional annexe accommodation to an existing Care Home.

Work includes a 24 unit extension with en-suite assisted shower rooms, a new day room facility, utility accommodation such as assisted bathrooms, utility space and an enhanced kitchen and service access.

The extension incorporates a series of 'broken' monopitch roofs that are angled to relate to the East Staffordshire context and break up the form of the building. A simple palette of sustainable materials have been chosen to give the facility a light, modern feel creating a positive environment for the buildings residents and operators.
